

Play Dough

- 2 1/2 C flour
 - 1/2 C salt
 - 1 T cream of tartar
 - 3 T vegetable oi
 - 2 packages unsweetened drink mix
 - 2 C water
1. Put water on to boil.
 2. Mix flour, salt, and cream of tartar in large bowl. Plastic is best.
 3. Once water is boiling turn off heat and add oil and drink mix to water.
 4. Pour water into dry ingredients and, using a wooden spoon or rubber spatula, mix until stuck together. It will still be lumpy.
 5. Sprinkle a little flour onto countertop and scoop out about 1/3 of the dough. If it is sticky sprinkle a little flour on top of it then knead several times until smooth. BE CAREFUL because the dough will still be very hot. Repeat with the remaining play dough until it is all smooth.

Once you start kneading you shouldn't have to add any more flour to the counterop. The oil in the dough keeps it from sticking and you don't want it too get too dry or stiff.
